

9TH CONSTITUTIONAL GOVERNMENT

Decree-Law no. 46/2023

of July 28th

Organic Law of the 9th Constitutional Government

On July 1st, 2023, the 9th Constitutional Government took office with a mandate given to it by the Timorese People to resume the path of social and economic development over the next five years. Thus, the Programme of the 9th Constitutional Government was approved. This Programme is a political instrument through which the Government will resume the roadmap defined by Timor-Leste to comply with the "2030 Agenda for Sustainable Development of the United Nations" and the Strategic Development Plan (2011-2030) during the next five years to achieve concrete progress in sustainable development and effective social development.

Economic diversification and job creation are priorities assumed by the 9th Constitutional Government to meet the population's needs. As such, the Government will invest effectively and efficiently in three key areas: social capital, infrastructure development and economic development, based on an institutional framework that promotes competence, professionalism, honesty and transparency. This is reflected in its Programme, which focuses on the themes of basic infrastructure and will seek to emphasise the economy as the crucial and vital factor for the development of the Nation, starting from agriculture, fisheries, livestock, tourism and the initiation of small and medium industries, to gradually reduce the import of goods and products, which can be produced in the country itself.

To deliver on these priorities, which cut across different areas of governance, a dynamic, collaborative and properly sectorally coordinated government is needed. This requires assigning to various government members the task of ensuring that all areas of government collaborate in the preparation of action programmes, that they actively participate in them and that the pace of their implementation corresponds to the expected programming. The importance of collaboration is also manifested in the joint or coordinated exercise of administrative powers shared by various government members, depending on their areas of intervention.

The organic law of the Government must reflect its actual structure and express the philosophy that shapes it. Therefore, the present decree-law reflects not only the most appropriate organisation for implementing the Programme, which includes areas and

programmes that cut across several government areas but also the response to the demands of this legislature.

The structure of the 9th Constitutional Government thus responds to these imperatives, enabling a greater focus on the provision of essential services to the Timorese, in particular, but not only in health and education, the improvement of methodologies and the operationalisation of administration and management, and also the implementation of the Strategic Development Plan.

Given the above, this Decree-Law approves the organic law of the 9th Constitutional Government, defines the attributions pursued by each of the Ministries and assigns the competences to the Government Members according to the priorities set out in its Programme.

Thus,

The Government decrees, following Article 115(3) of the Constitution of the Republic, to be valid as law, as follows:
